Summary

- Computer Science graduate from PIEAS with hands-on experience building AI systems using transformer-based models, Retrieval-Augmented Generation (RAG), computer vision, and deep learning.
- Experienced with Python, LangChain, Gemini API, Qwen2.5-VL, LoRA fine-tuning, and Linux-based development environments through academic and personal AI projects.

Education

Pakistan Institute of Engineering and Applied Sciences (PIEAS)

Sep 2022 – Jun 2026

Bachelor of Science in Computer and Information Sciences

Islamabad, Pakistan

Projects

AI Motion Capture for Personalized Fitness Training | *Python, PyTorch, OpenCV, MediaPipe, Qwen2.5-VL, LoRA, RAG*

- Developed an AI-powered fitness coaching system using computer vision, pose estimation, and transformer-based Vision-Language Models.
- Fine-tuned Qwen2.5-VL using LoRA techniques to generate personalized exercise correction feedback.
- Implemented Retrieval-Augmented Generation (RAG) pipelines for exercise-specific coaching recommendations.
- Evaluated LSTM, Transformer Encoder-Decoder, and Vision-Language architectures for human motion understanding and feedback generation.

RAG PDF Chatbot | *Python, LangChain, LLMs*

- Developed a Retrieval-Augmented Generation (RAG) chatbot capable of answering questions from uploaded PDF documents.
- Implemented document chunking, embedding generation, semantic retrieval, and context-aware response generation.
- Built LangChain pipelines to improve factual grounding and reduce hallucinations in generated responses.
- Designed an interactive question-answering workflow for document exploration and knowledge retrieval.

Student Performance Analysis System | *Python, Pandas, NumPy*

- Analyzed academic datasets to identify performance trends and learning patterns.
- Performed preprocessing, statistical analysis, and visualization using Python-based data science tools.

Technical Skills

Languages: Python, JavaScript, C/C++, SQL

AI / Machine Learning: Deep Learning, Computer Vision, Pose Estimation, Transformers, Vision-Language Models, Large Language Models (LLMs), LoRA Fine-Tuning, Retrieval-Augmented Generation (RAG), Prompt Engineering, Model Evaluation

Frameworks & Libraries: PyTorch, LangChain, OpenCV, MediaPipe, Hugging Face Transformers, Scikit-Learn, Pandas, NumPy, Matplotlib

Web & Databases: Node.js, Express.js, React.js, MongoDB, MySQL, REST APIs

Tools: Linux, Git, GitHub, VS Code, Jupyter Notebook, Google Colab

Leadership / Extracurricular

IEEE PIEAS Student Chapter

Sep 2022 – July 2025

- Coordinated 5+ technical workshops and seminars, promoting engineering concepts to 100+ peers.

PIEAS Orientation Week '23

Sep 2023 – Sep 2023

- Led mess security logistics and resource allocation for 240+ students during orientation week.

Educational Support & Mentorship

May 2016 – Oct 2025

- Led a multi-year drive providing 50+ books to 15+ students along with academic mentorship.
